Ninth Week

July 24, 2006
Today I worked with my new macbook in Texas. And it is kind of difficult, but still fun.
The reason that I can not access database remotely is the configuration of my project has
some wrong setting.

```
52          <deny        users="[comma separated list of users]"
53                       roles="[comma separated list of roles]"/>
54              -->
55      </authorization>
56
57      <!--  APPLICATION-LEVEL TRACE LOGGING
58              Application-level tracing enables trace log output for every page within an application.
59              Set trace enabled="true" to enable application trace logging.  If pageOutput="true", the
60              trace information will be displayed at the bottom of each page.  Otherwise, you can view t
61              application trace log by browsing the "trace.axd" page from your web application
62              root.
63          -->
64      <trace enabled="false" requestLimit="10" pageOutput="false" traceMode="SortByTime" localOnly="tr
65
66
67      <!--  SESSION STATE SETTINGS
68              By default ASP.NET uses cookies to identify which requests belong to a particular session.
69              If cookies are not available, a session can be tracked by adding a session identifier to t
70              To disable cookies, set sessionState cookieless="true".
71          -->
72      <sessionState
73              mode="InProc"
74              stateConnectionString="tcpip=127.0.0.1:42424"
75              sqlConnectionString="data source=DSN=127.0.0.1;Trusted_Connection=yes"
76              cookieless="false"
77              timeout="20"
78      />
79
80      <!--  GLOBALIZATION
81              This section sets the globalization settings of the application.
82          -->
83      <globalization requestEncoding="utf-8" responseEncoding="utf-8" />
84
85   </system.web>
86
87 </configuration>
88
```

The problem locates where I highlights. I am trying to solve it.

July 25, 2006
I begin the smart devise project.

my application, I am working in making the button work.

July 26, 2006

There are still three questions that need I solve before I leave.
First, try to connect with database
Second, try to formatting results
Third, make PDA application network works.
Two days left, good luck to me.
July 27, 2006
Deploy the PDA application
Solve configuration problem
July 28, 2006
I work on my Final Report.
